

Integration and Support API

Endpoints

Method	Path	Purpose
GET	/health	Basic service health probe.
GET	/ui/api/summary	Platform-wide overview for the main console.
GET	/ui/api/integration	Project-aware operational snapshot including quota mode and metrics summary.

GET /health

Success response

```
{"status": "ok"}
```

GET /ui/api/summary

Response fields

- health
- active_instance_count
- scalable_instance_count
- status_breakdown
- recent_instances
- modules

GET /ui/api/integration

Optional query parameter

- project_id string

Behavior

- Without a project ID, returns platform status only.
- With a project ID, includes instance state, scalable count, workload profile, latest project metrics totals, and estimated billing.

Success response 200 OK

```
